

Impeller Pump.

Description

The Hagyo Distilling Impeller Pump is a durable unit that provides easy and efficient, bi-directional transfer of liquid and thicker consistency mashes such as fruit, potato, or grain. This rust proof stainless steel construction unit comes mounted on a mobile stainless steel frame for ease of use and mobility.

Standard Features

Operation Requirements

- 3 phase, 240 V electricity
- Mash transfer hoses

Construction Material

Specifications

Specification	USA	EU
Electrical usage	1.8 kW	1.5 kW
Connection points	3" Tri-Clamp	
Minimum temperature:	Min. -20°C / -4°F / 253K, Recommended: 0°C / 32°F / 273K	
Maximum temperature:	Max. 120°C / 248°C / 393K	
Max electricity used:	3x16A, 3x240V, 60 Hz	3x16A, 3x230V, 50 Hz
Mash flow:	Up to 11,000 l/hour (at H = 3m / 9'10")	
Weight:	99 lb (45 kg)
